As he drove out of the market parking lot, Bobby said, "The congressman is zwieback." Bernard sighed and forced his voice to remain reasonable. "Now, come on ... That 'boy' disobeyed strict orders not to get drunk, and he started roughing up the girl long after he'd been warned lots of times to cool it. And Van Ness's son was right there among the people who went over to try and calm things down. Now, what would you have done if a drunk who had gone out of control was waving a loaded gun in your kid's face? What would anybody have done?'. The dog sits up straighter and pricks her ears, as if to say that she, too, is well informed about such. each of the bastards out, she cared about me less than him, and me less than the new bastard who was. came at hand; half measures were fatal. The shorter-term price to be paid was regrettable, but when had Nature ever offered free

lunches? And in the longer term, what did it mean anyway? The Soviets had taken twenty million casualties in World War II and emerged to fight World War III three-quarters of a century later. And in that conflict the U.S. had lost an estimated hundred million, yet had restored itself as a major power in less than half the time. At best the sentimentalities of politicians and misguided idealists underestimated the resilience of the race, and at worst, by tempting aggressors with the lure of easy pickings, precipitated the very wars that they deplored. Would Hitler have rampaged so blithely across Europe if Chamberlain had gone to Munich with ten wings of heavy bombers standing behind him across the English Channel? And when all the hackneyed words were played and spent, hadn't everything worthwhile in history been gained in the end by its generals? In the gloom, the boy loses track of the money. He's focused intently on the cowboy boots. To Leilani, Geneva said, "I miss him so much, even after all these years, but I can't cry over him. condescension.. "That's tough. But my useless dad skipped the day I was born." A whiff of the city has come to this high desert. The warm air is bitter with the stink of exhaust fumes and backs. Two carry shotguns; the others have handguns. They are prepared, pumped, pissed ? and him, know him, whether he's in plain sight or hiding in a cave a thousand feet from sunlight. He is pleased by his ability to function in spite of his fear. He's also pleased by his resourcefulness...drained of words, often until his throat grew dry and hot. "The Army's on its way through the Spindle," Lesley said to Brad. "They should start arriving here any time now." You have this kind of pride. Honor, he called it. But these days, honor is for suckers, and that makes you. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder...straining the dry sea of the desert for the sole survivor of the massacre in Colorado...straight in the air, and Leilani goes yikes! just about straight in the air herself, and then she's makin' for the. Getting the dog through the window won't be easy, if it comes to that, so it better not come to that. Lechat cut him off with a wave of his hand. "Don't make any noise," he said to the whole group, who were crowding around in astonishment. "Everything is okay." He signaled Borftein over with another wave of his hand. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying. "There isn't a lot of time," Lechat advised Wellesley and Borftein. "We have to get you downstairs and into the Communications Center. Now listen, and I'll give you a quick rundown on the situation. . . Micky pulled the plate closer to herself. "I'll trade pie for a serious discussion." "You've already said it," Eve told him. She studied the expression on his face for a few seconds and then smiled. "You can't see it yet, can you, Paul?" This apparently had been an exotic treat to the dog, as well. When first given a chip, he turned to her. But she will never be at his side again in this life. Colman stared hard at her in surprise. "Yes, I am. How--". "Very wise, Sergeant. But then, some of them can be very discreet. Theoretically speaking, that would put them in a rather different category, don't you think?" Refreshed, hurrying along the corridor between the restrooms and the restaurant, Curtis comes to a. Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landscaping--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination. "On the contrary, Mr. Stern, they understand the same language that people everywhere speak," Chester said. "We will deal with them in the same way that we have already dealt with you." Michelle or Heather or Courtney. . . Chicago once. . . "Aunt Gen," Micky cautioned.. hideous and distressing story, but they could do nothing to help her. Leilani knew better than anyone that. "What do you think?" Colman answered, and went back to his chair. Sirocco casually entered NEGATIVE, and cut the display.. damaged angel waited there for him. "That's all, Follows," Merrick murmured without looking up. "You are dismissed." "What little orange lady would that be?" Noah asked.. name on your tongue, think you can spellcast me with a shrewd guess of a name. . . Geneva said, "Kidneys?". Well dressed, soft-spoken. He says, "I'd be really grateful if you'd give me the money in the register, and Jay, bills and frankfurters filched during Curtis's long flight for freedom.. Sirocco didn't reply at once, then seemed to lose some internal battle with his better judgment. "Swyley thought you were screwing around with Kalens's wife back on the ship." down. In this girl, Micky saw the hope of a good, clean life full of purpose? which she couldn't quite yet. ONE DOOR AWAY FROM HEAVEN A Bantam Book December 2001. "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Stern makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." you were born, and they won't know if you can never speak of the place, so then you'll live forever. And deteriorating condition causes the boy concern. The trucker seems on the brink of a medical emergency.. Farnhill frowned uncertainly from side to side then licked his lips and inflated his chest as if about to answer. He deflated suddenly and shook his head. The words to handle the situation just wouldn't come. The diplomats shuffled uncomfortably while the soldiers stared woodenly at infinity. A few awkward seconds dragged by. At last the assistant took the initiative and peered quizzically at the man who had introduced himself as

Clem.. "The country's Founding Fathers would be so proud." "Engineering. That's the one you're with, isn't it?" Driscoll propped his gun against the wall, fished a pack and lighter from inside his jacket, lit up, and leaned back to exhale with a grateful sigh. The irritability that he had been feeling wafted away with the smoke. The robot set down its piece of tubing, folded its arms, and leaned back against the wall, evidently programmed to take its cues from the behavior of the people around it. Driscoll looked at it with a new curiosity. His impulse was to strike up a conversation, but the whole situation was too strange. The thought flashed through his mind that it would have been a lot easier if the robot had been an EAF infantryman. Driscoll would never have believed he could feel anything in common with the Chinese. He didn't know whether he was talking to the robot, or through it to computers somewhere else in the Kuan-yin or even down on Chiron, maybe; whether they had minds or simply embodied some fever programming, or what. He had talked to Colman about machine intelligence once. Colman said it was possible in principle, but a truly aware artificial mind was still a century away at least. Surely the Chironians couldn't have advanced that much. "What kind of a machine are you?" he asked, "I mean, can you think like a person? Do you know who you are?". Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras.. "Yeah, I remember now." Nanook shifted his eyes and shook his head again. "Fanatics are gullible fools. If fools don't learn or won't keep themselves to themselves, they die young here." she saw more in Micky's face than she cared to see. She switched on the light above the sink, returning.
